

Front End 101

Lesson 11: CSS Transitions and Animations

Schedule

Part 1 - Final Project Assignment, Intro to T + A

1. Final Project
2. 2D Transforms
3. 3D Transforms
4. Transitions
5. Animations

Part 2 - Advanced Exercises

Homework

Goals

1. Understand the practical application of CSS3 transforms, transitions, and animations
2. Get familiar with the necessary syntax to create a CSS3 animation

Assignment

1. Create a "cheat sheet" illustrating all of the different CSS properties we learned about today, with descriptions of each property and how it is used
2. Bonus: Make a CSS animation "movie" including subtitles that is at least 50 seconds long. Get creative!

Recommended Activity

Understand which browsers you can use your newly found animation skills with:
